

InstallerNet and Complete Innovations collaborate on fleet installation services

BOSTON, MA – December 15, 2009 – InstallerNet, the leading specialist in merchandizing and coordinating installations for telematics and mobile electronics, has announced a new partnership with Complete Innovations Inc., a leading global provider of operational solutions for mobile workforce and transportation-related companies.

InstallerNet will provide installation and support services for Complete Innovations' range of services, including Fleet Complete®, a GPS-based fleet management system, and Courier Complete®, the leading dispatch and tracking application for the courier industry. InstallerNet's nationwide network of professional technical experts will be available to deploy, for instance, Complete Innovations' GPS modems in both small and large vehicle fleets across North America. With over 3,500 locations and over 6,000 installers across the United States and Canada, InstallerNet has a footprint that reaches from coast to coast.

"We are extremely pleased to work with Complete Innovations and their customers across the continent," said Frank Pellitta, vice president of wireless and telematics at InstallerNet. "Our deep experience in deploying GPS and other vehicle information systems, together with a true national network of installers will provide a convenient and reliable way for customers to implement the turnkey fleet and mobile resource solutions that Complete Innovations offers."

InstallerNet's network of expert technicians has also built deep experience with millions of successful deployments. The Company maintains a state-of-the-art vehicle database documenting the location of OBDII ports in over 22,500 vehicles, and has streamlined processes for project management to ensure fast quality service.

"Partnering with InstallerNet was a natural fit, as they share the same business objectives that we do – to provide organizations with cost effective solutions that significantly improve overall business processes," said Tony Lourakis, president & CEO, Complete Innovations Inc. "Through cutting edge solutions, such as Fleet Complete, companies can now equip their teams with GPS-enabled technology that easily tracks, manages and streamlines communications between the front office and the field worker to improve overall efficiencies and reduce day-to-day operational costs."
